

Palliative Care Study Days: Advanced

Learning outcomes:

This advanced palliative care study day is a follow on from the introductory day. Nurses who have attended the introductory day at Hutt Hospital or have attended other palliative care study days are welcome to attend. It will explore in more depth communication, psychosocial aspects of palliative care and symptom management so that nurses can utilise their nursing skills when working with palliative care patients and whānau.

Content:

- Advanced assessment and management of symptoms
- Spiritual/cultural care
- Palliative care emergencies
- Family care – communication
